HELIXX™ MATERIAL DELIVERY

The patent-pending corkscrew design of the HELIXX material delivery system is optimized for efficient and cost-effective use of salt, and was designed to operate in the target range for salt spreading best practices. Its innovative design helps prevent clogs and provides a superior material flow to traditional augers.

STAINLESS STEEL CONSTRUCTION

Hopper and frame are constructed of corrosion-resistant stainless steel. The frame features a unique leg and sill design to form a ridged backbone structure for greater durability, and riveted construction provides consistent, quality joints.

CHUTE BAFFLE SYSTEM

Baffles within the chute direct material to key areas on the spinner resulting in a remarkably even and consistent spread pattern, as well as reducing material directed back at the vehicle.

ACCESSORY INTEGRATION

Conveniently connect accessories directly into the hub mounted in the back of the hopper. Accessories automatically integrate with the hopper control without having to run additional wires from the front of the vehicle.

FULL LENGTH HELIXX DESIGN

The HELIXX system runs the entire length of the hopper with variable flights, promoting even unloading of material.

FLIP-UP/REMOVABLE CHUTE

Remove a single pin to flip-up the chute, or two pins to take it off entirely, for easy hitch access and more flexible storage. Molded spinner plug must be removed when flipped for dumping.

DUAL VARIABLE-SPEED CONTROL

Allows for variable control of spinner and HELIXX speeds for precise material delivery at both a low or high output. Features auto reverse and integrates with accessories.

MODEL:	12145
Capacity (Volume)	0.35 cu yd
Capacity (Weight)	750 lb
Empty Weight	192 lb
Hopper Length	30"
Min. Bed Length Req.	28.5"
Spread Width	30'

EXTENSION
