DUMP BOX
TAILGATE
SPREADER

FEATURES & SPECIFICATIONS

REPLACEABLE TAILGATE DESIGN

Replaces the dump body tailgate to take better advantage of the large capacity of a dump box by turning it into a high-volume spreader during winter months.

EFFICIENT DIRECT DRIVE TRANSMISSION

A compact, weather-resistant direct drive transmission delivers efficient flow to the spinner by reducing potential binding and bridging of materials. The unit's heavy-duty solid steel construction provides maximum torque.

VIBRATOR

Reduces material clumping for continuous material flow.

WORK LIGHT

Standard work light provides better visibility of the spinner area during dark or snowy conditions.

STANDARD UNIVERSAL MOUNTING KIT

Allows spreader to easily attach to a wide variety of dump bodies. Since this electric powered spreader doesn't require hoses, pumps or other hydraulic components, dump boxes can be converted for spreading quickly.

DUAL-VARIABLE SPEED CONTROL

Allows for variable control of spinner and auger speeds for precise material delivery, whether at low or high output.
