STAINLESS STEEL CONSTRUCTION

Hopper and frame are constructed of corrosion-resistant stainless steel. The frame features a unique leg and sill design to form a ridged backbone structure for greater durability, and riveted construction provides consistent, quality joints.

CHUTE BAFFLE SYSTEM

Baffles within the chute direct material to key areas on the spinner resulting in a remarkably even and consistent spread pattern, as well as reducing material directed back at the vehicle.

ACCESSORY INTEGRATION

Conveniently connect accessories directly into the hub mounted in the back of the hopper. Accessories automatically integrate with the hopper control without having to run additional wires from the front of the vehicle.

FULL LENGTH HELIXX™ SYSTEM

The HELIXX system runs the entire length of the hopper with variable flights, promoting even unloading of material.

FLIP-UP/REMOVABLE CHUTE

Remove a single pin to flip-up the chute, or two pins to take it off entirely, for easy hitch access and more flexible storage. Molded spinner plug must be removed when flipped for dumping.

DUAL VARIABLE-SPEED CONTROL

Allows for variable control of spinner and HELIXX speeds for precise material delivery at both a low or high output. Features auto reverse and integrates with accessories (including pre-wet and direct liquid application on the 12140 model).

ADDITIONAL FEATURES: Dump Switch & Work Light, Top Screen, No-Blast Startup, Rear-Mounted Gear Box, Accessory Knock-Outs

MODEL:	12140
Capacity Volume	0.7 cu yd
Capacity Weight	1,500 lb
Empty Weight	337 lb
Hopper Length	54.5"
Min. Bed Length	44"
Spread Width	30'

TRIPLE THREAT

Pre-Wet and Direct Liquid Application

The HELIXX™ spreader is a triple threat—with the ability to spread, pre-wet or spray. By adding pre-wet tanks, a pump and a spray kit, the spreaders not only can pre-wet materials, but they can also be used for spraying brine directly onto the driving surface for anti-icing applications.

INTEGRATED ACCESSORIES

Optional accessories such as lights, strobes and pre-wet systems easily plug into the control module and are operated with simple on/off buttons on the control. See Pages 28-30 for additional accessories.
